*UTC confirms Vaupell NE as Approved Tooling Supplier*

During a visit to Vaupell's Northeast Molding & Tooling facility in Agawam, MA, United Technologies Corporation concluded an Agreement to elevate Vaupell to Corporate Tooling Supplier status. This aligns with UTC's policy to re-define their supply base, and gives Vaupell the ability to further develop supply programs with UTC Group members such as Pratt & Whitney, Sikorsky, Hamilton Sundstrand, Carrier and Otis. Vaupell currently supplies UTC companies with tool design and manufacturing of precision tooling and gauging, holding fixtures and aircraft work stands.
