Vaupell ranked #86 among US molders

In "Plastics News" most recently published April 16th listing of US injection molders, Vaupell, with sales of \$76 million, stands at number 86 out of 635 ranked companies. Especially noteworthy is Vaupell's position as third largest molder of high-heat advanced polymers such as PEEK, Ultem and Radel. These resins are used by Vaupell extensively for critical medical and aerospace applications. Vaupell is considered to be a world leader in aerospace interior assemblies, and in implantable and resorbable medical devices.
